Is your computer slow?

Does it need help?

Spinning beach ball. Fan screaming. Updates that never finish. You're not imagining it — your machine is in decline.

ASK YOURSELF:

- ☐ Takes forever to open email?
- ☐ Sounds like a leaf blower?
- ☐ Family says "just buy a new one"?
- ☐ You've already said goodbye once?

We don't fix dying computers. We help you let them go — with dignity, paperwork, and zero false hope.

PUBLIC SERVICE ANNOUNCEMENT

Warning signs your PC needs hospice

1. It boots like it's climbing stairs.
2. The fan has become a personality.
3. Chrome has 47 tabs and a death wish.
4. Updates promise hope. Deliver nothing.
5. You've already named a successor laptop.

IF YOU CHECKED THREE OR MORE...

It may be time.

Comfort care. Not miracles.
